Tropical Storm Isaac27 Summary Update	Monday 08/27/2012 21:00 UTC Advisory 27
<b>KBVE - Venice, LA</b>	
KBVE - Venice, LA is under a Hurricane Warning and is expected to receive a major impact from Tropical Storm Isaac27.	
Northerly gale force winds should start affecting the area on Tuesday, August 28th at 03:00 UTC with storm force winds arriving around 16:00 UTC and Northeasterly hurricane force winds arriving near 22:00 UTC. The highest wind speeds from Tropical Storm Isaac27 should occur near 01:00 UTC when top sustained winds, from the Southeast, could reach 83 knots with gusts near 101 knots. Winds should decrease below hurricane force shortly thereafter.	
Sustained winds will fall below gale force after 03:30 UTC and generally be from the South during this period of decreasing winds. Expect gusts above gale force level for several more hours thereafter.	
Wind damage from Tropical Storm Isaac27 could be significant with a few homes being shifted off of their foundation and large section of roof removed. It will also likely include collapse of chimneys, garage doors and loss of porches and/or carports.	
The total rainfall for the KBVE - Venice area over the next 3 days is forecast to be 14.3 inches. This can vary significantly as tropical storm and hurricane rainfall is very difficult to predict.	
Watches/Warnings	Hurricane Warning
Estimated Time of Gale force winds:	Tuesday 08/28/2012 03:00 UTC
Duration of Gale force winds:	49 hours
Estimated speed of Maximum Winds (Sustained / Gusts)	83 KNOTS / 101 KNOTS
Estimated time of maximum winds:	Wednesday 08/29/2012 01:00 UTC
Duration of Hurricane Force Winds:	6 hours
Estimated closest point of approach:	16 miles
Forecast Rainfall (3 day total):	14 inches
Wind Probabilities (34, 50, 64 knots):	98% 79% 48%

Tropical Storm Isaac27 Summary Update	Monday 08/27/2012 21:00 UTC Advisory 27
<b>KMSY - New Orleans, LA</b>	
KMSY - New Orleans, LA is under a Hurricane Warning and is expected to receive a major impact from Tropical Storm Isaac27.	
Northeasterly gale force winds should start affecting the area on Tuesday, August 28th at 09:30 UTC with storm force winds arriving around 01:00 UTC and Northeasterly hurricane force winds arriving near 08:00 UTC. The highest wind speeds from Tropical Storm Isaac27 should occur near 09:00 UTC when top sustained winds, from the Northeast, could reach 82 knots with gusts near 99 knots.	
Based on the current forecast, there is a good chance that KMSY - New Orleans will experience the eye wall of the storm, with the passage of the eye on Wednesday, August 29th at 11:30 UTC. This could result in higher wind speeds than expected. In addition, if this is a coastal location, storm surge levels may be at their highest. Winds should decrease below hurricane force 7 hours later.	
Sustained winds will fall below gale force after 12:30 UTC and generally be from the Southwest during this period of decreasing winds. Expect gusts above gale force level for several more hours thereafter.	
Wind damage from Tropical Storm Isaac27 could be significant with a few homes being shifted off of their foundation and large section of roof removed. It will also likely include collapse of chimneys, garage doors and loss of porches and/or carports.	
The total rainfall for the KMSY - New Orleans area over the next 3 days is forecast to be 9.8 inches. This can vary significantly as tropical storm and hurricane rainfall is very difficult to predict.	
Watches/Warnings	Hurricane Warning
Estimated Time of Gale force winds:	Tuesday 08/28/2012 09:30 UTC
Duration of Gale force winds:	52 hours
